Passionate for the sea

From anchorages to anchorages, according to the miles travelled, after having experienced all the styles of boats, we have made a synthesis and created the sailboats of our dreams.

since always.

Another idea of life at sea

Our will is naturally oriented towards the sail which remains the most ecological. But when the wind is capricious, the journey cannot stop, because our daily life has its demands.

We have equipped our ships with hybridization technological development, both for propulsion (sail and engine) than for energy (generators and photovoltaic). We imagined energy efficient ships.

meters

These new sailing yachts combine the renowned know-how of shipyards traditional Turkish to European standards of the Yachting industry in engineering, construction management, equipment, and interior design.

Huge dedicated outdoor beds to relaxation and contemplation. Absolute comfort, in a refined interior, entirely made to measure and to your liking, by craftsmen of great value.

The MITI ONE 34m is already well advanced :
delivery scheduled for june 2021

The MITIK 50m is under construction :
available from winter 2021/2022

MITI ONE

MITI One 34m offers a volume impressive 198GT and will accommodate 11 passengers in five cabins, with a crew of 4 to 6 peoples.

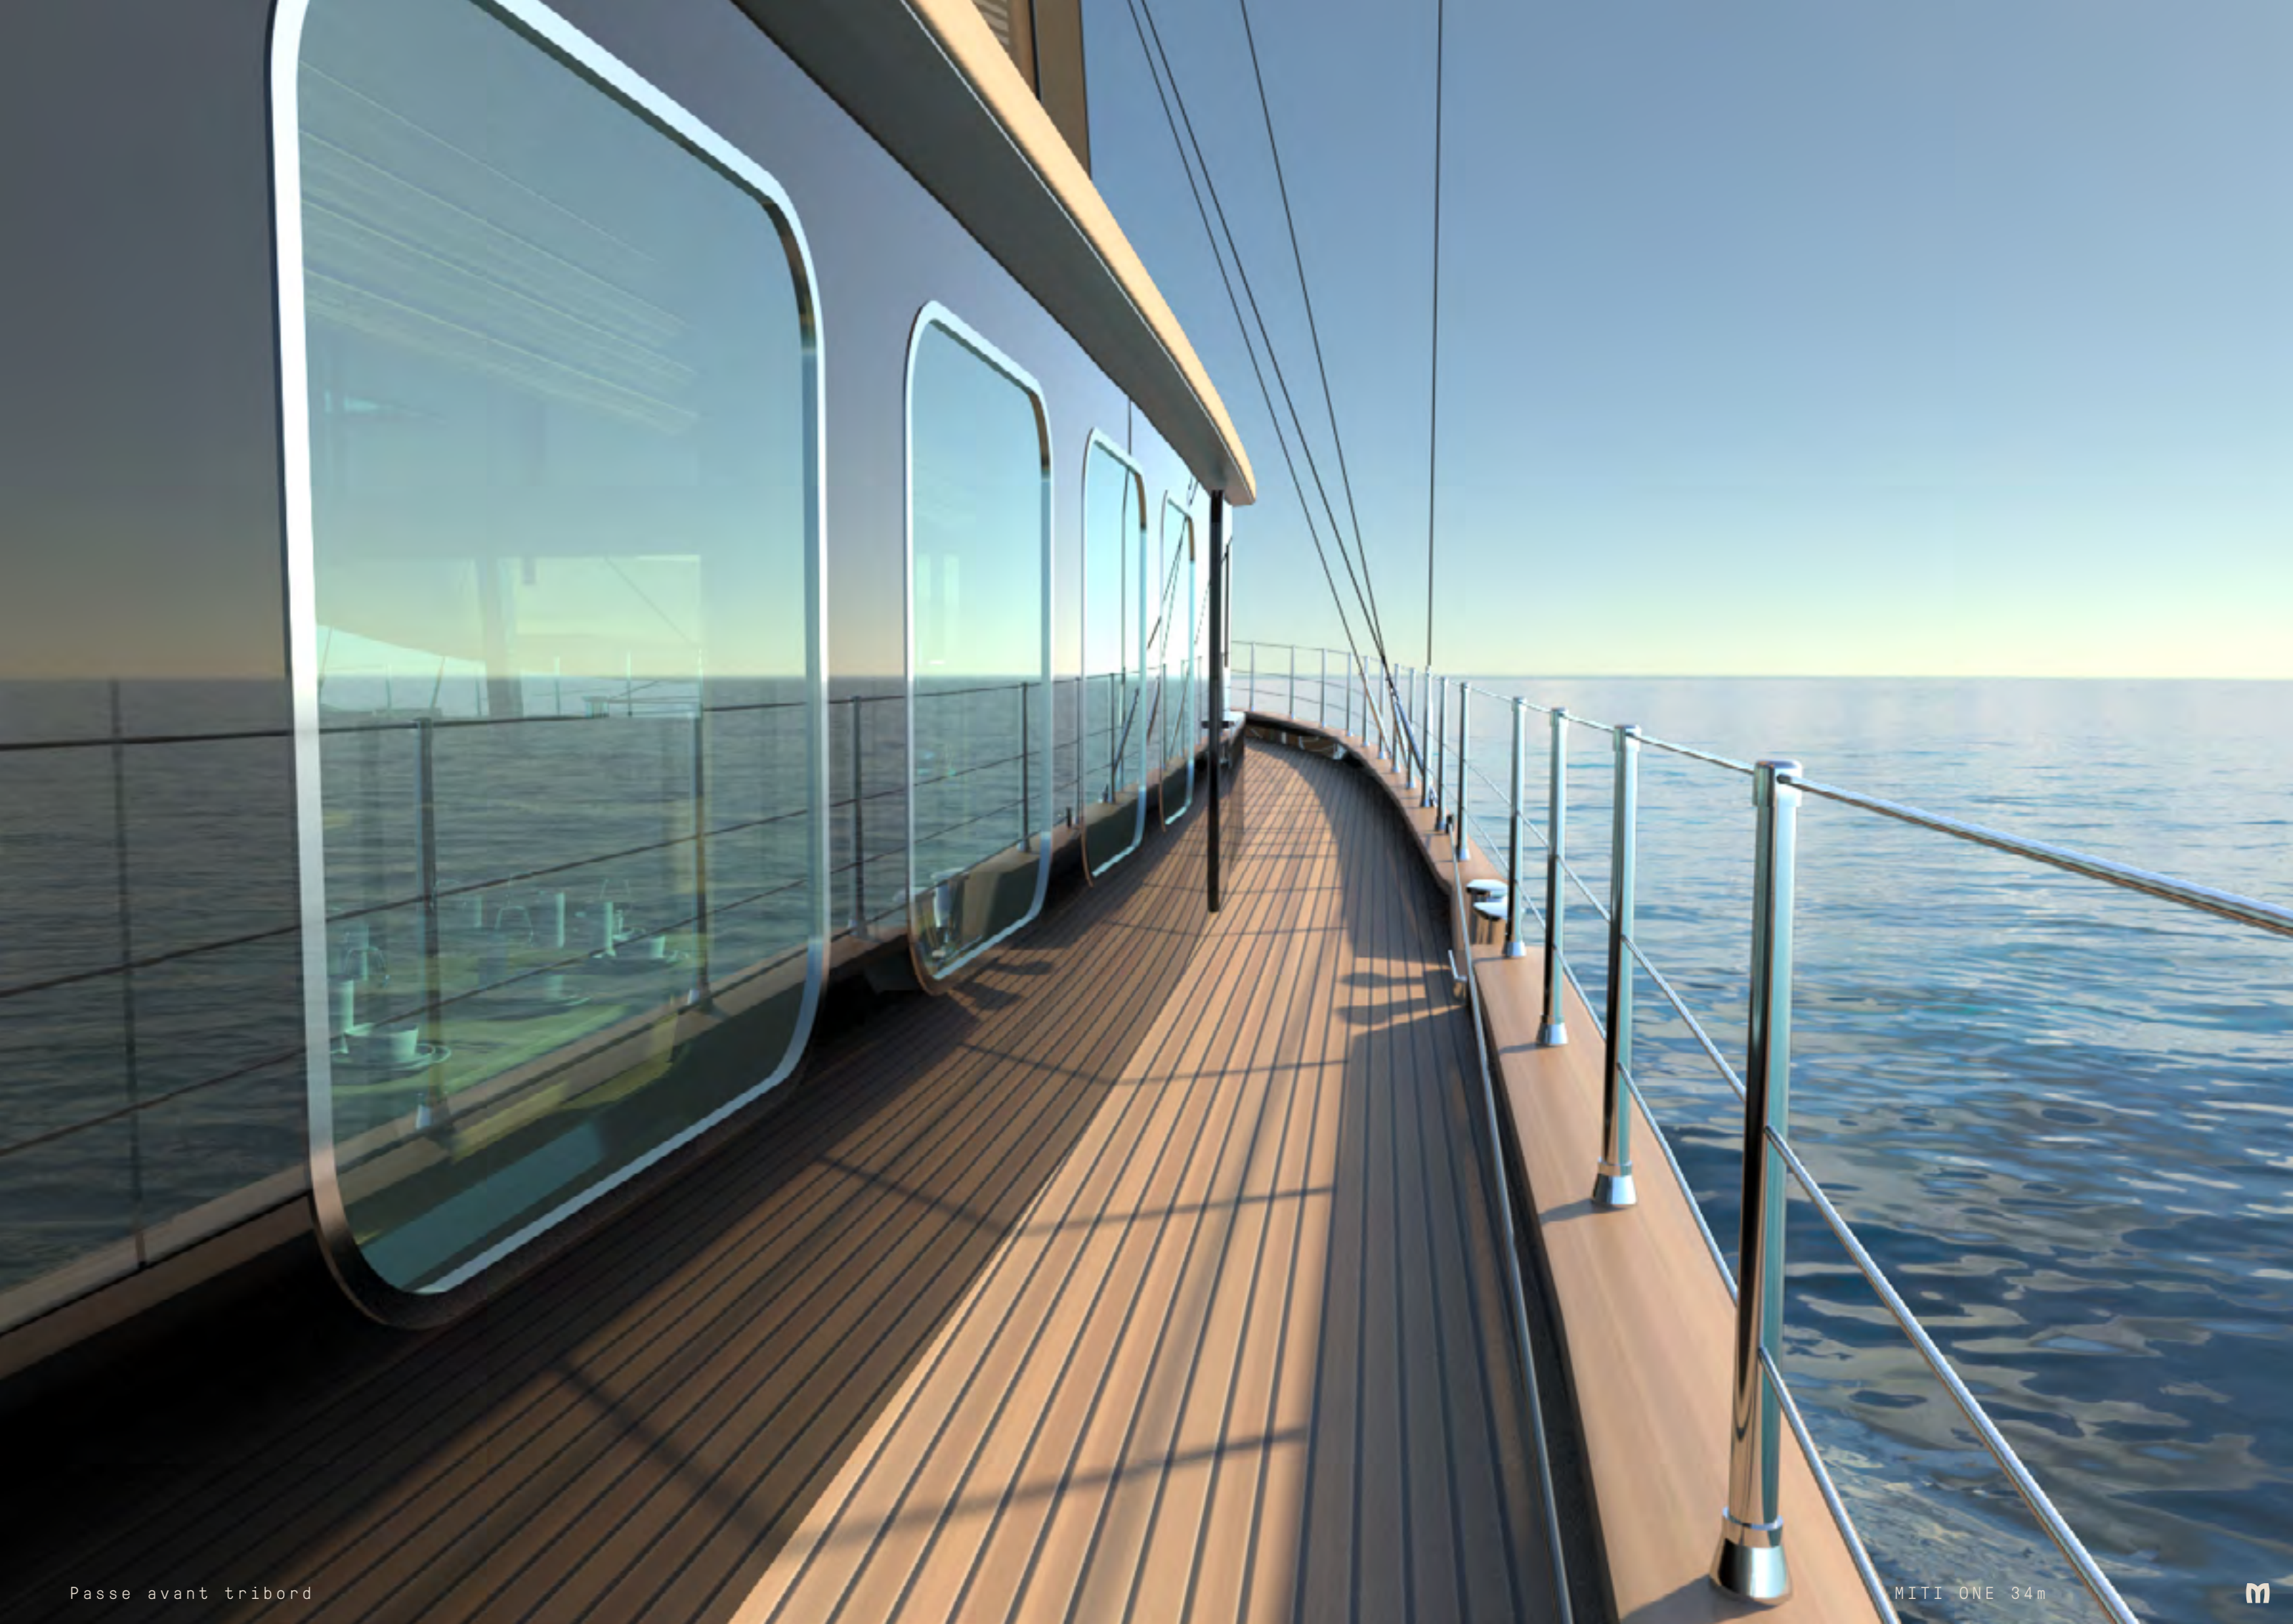

The guests enter the boat from the huge rear platform. Exterior decks are spacious, welcoming.

They give directly onto a volume bright interior: large living room, dining room and bar. The cabins comfortable, all equipped with bathrooms, take place in the spacious and pleasant part of the hull.

MITI ONE

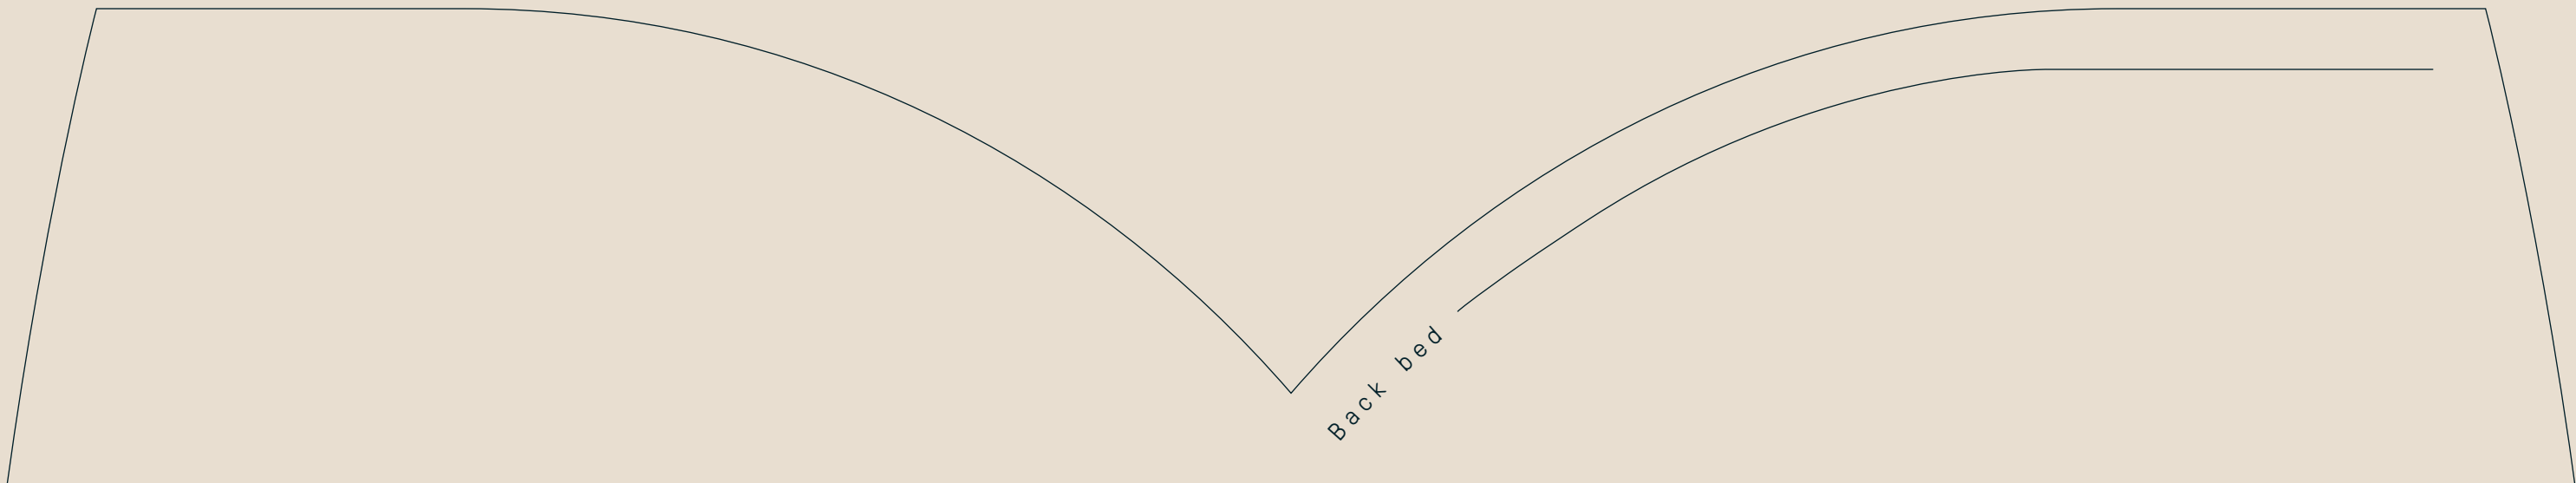

The aft deck accommodates a second dining room, shaded and comfortable, near a huge 5m bed.

Front bed

Another huge bed is located at the front of the ship, to enjoy gentle sailing.

MITIK

MITI K 50m

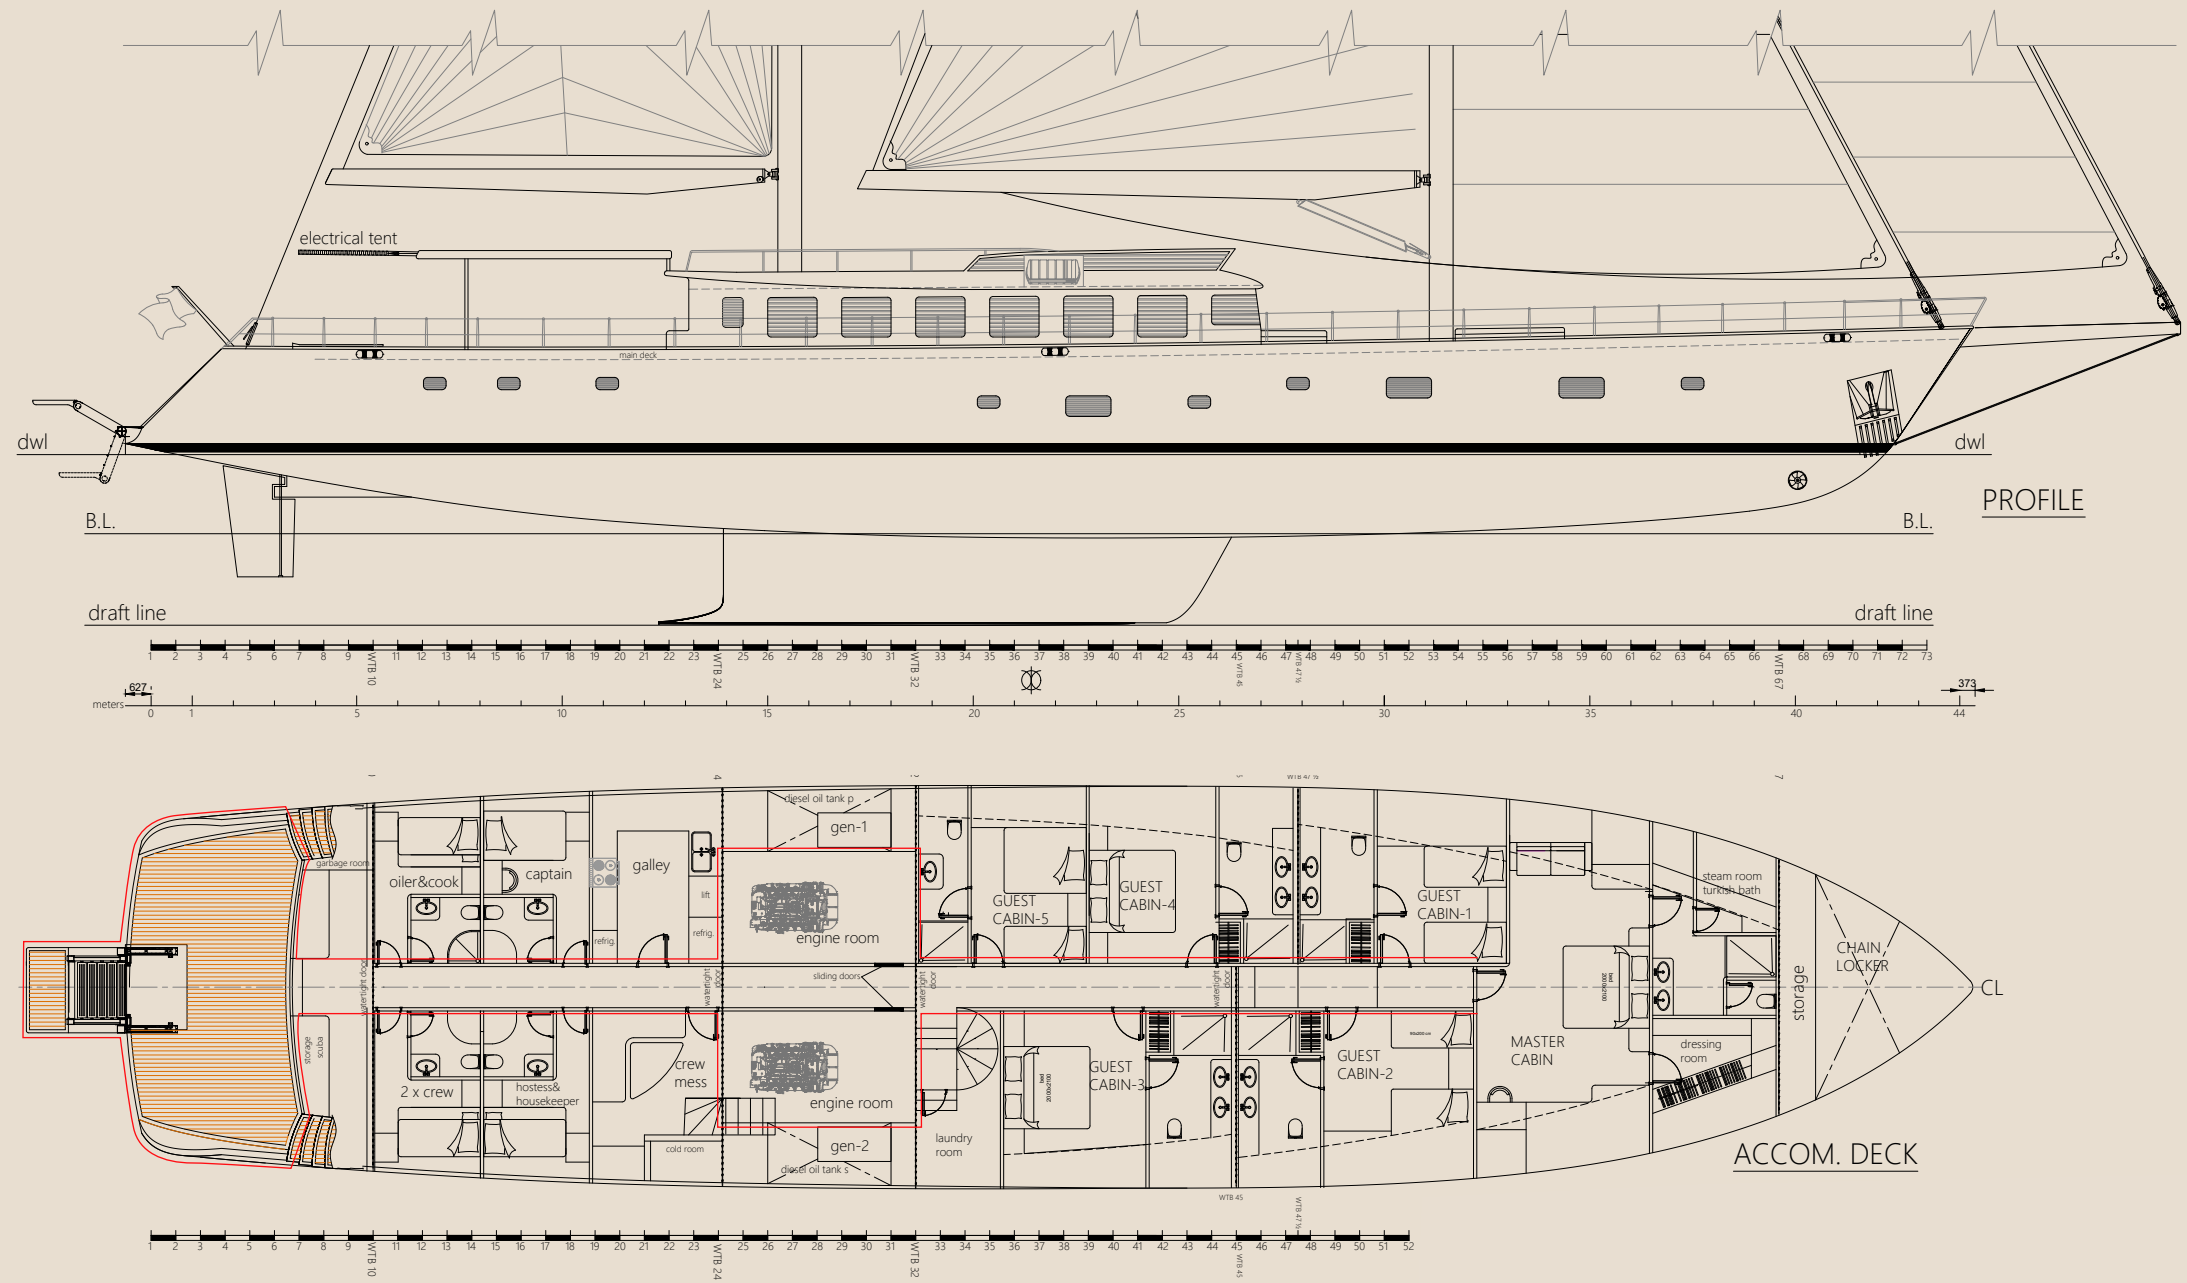

Currently under construction in the Oguz Marin Shipyard of Bodrum in Turkey, the S/Y MITI NAVI are beautiful steel hulls. Adapted to trans-oceanic navigation, they meet the RINA Classification standards. The superstructures are in steel (24m-34m), or in aluminium (42m- 50m).

Maximum speed: 14.5 Knots
 Cruising speed: 11.5 knots.

The rear deck of 28m² is reachable by the bridge or directly from the cabins; a passage privileged exists between passenger cabins and swim platform that takes you through the room machines you can see it work through windows in allow glass.

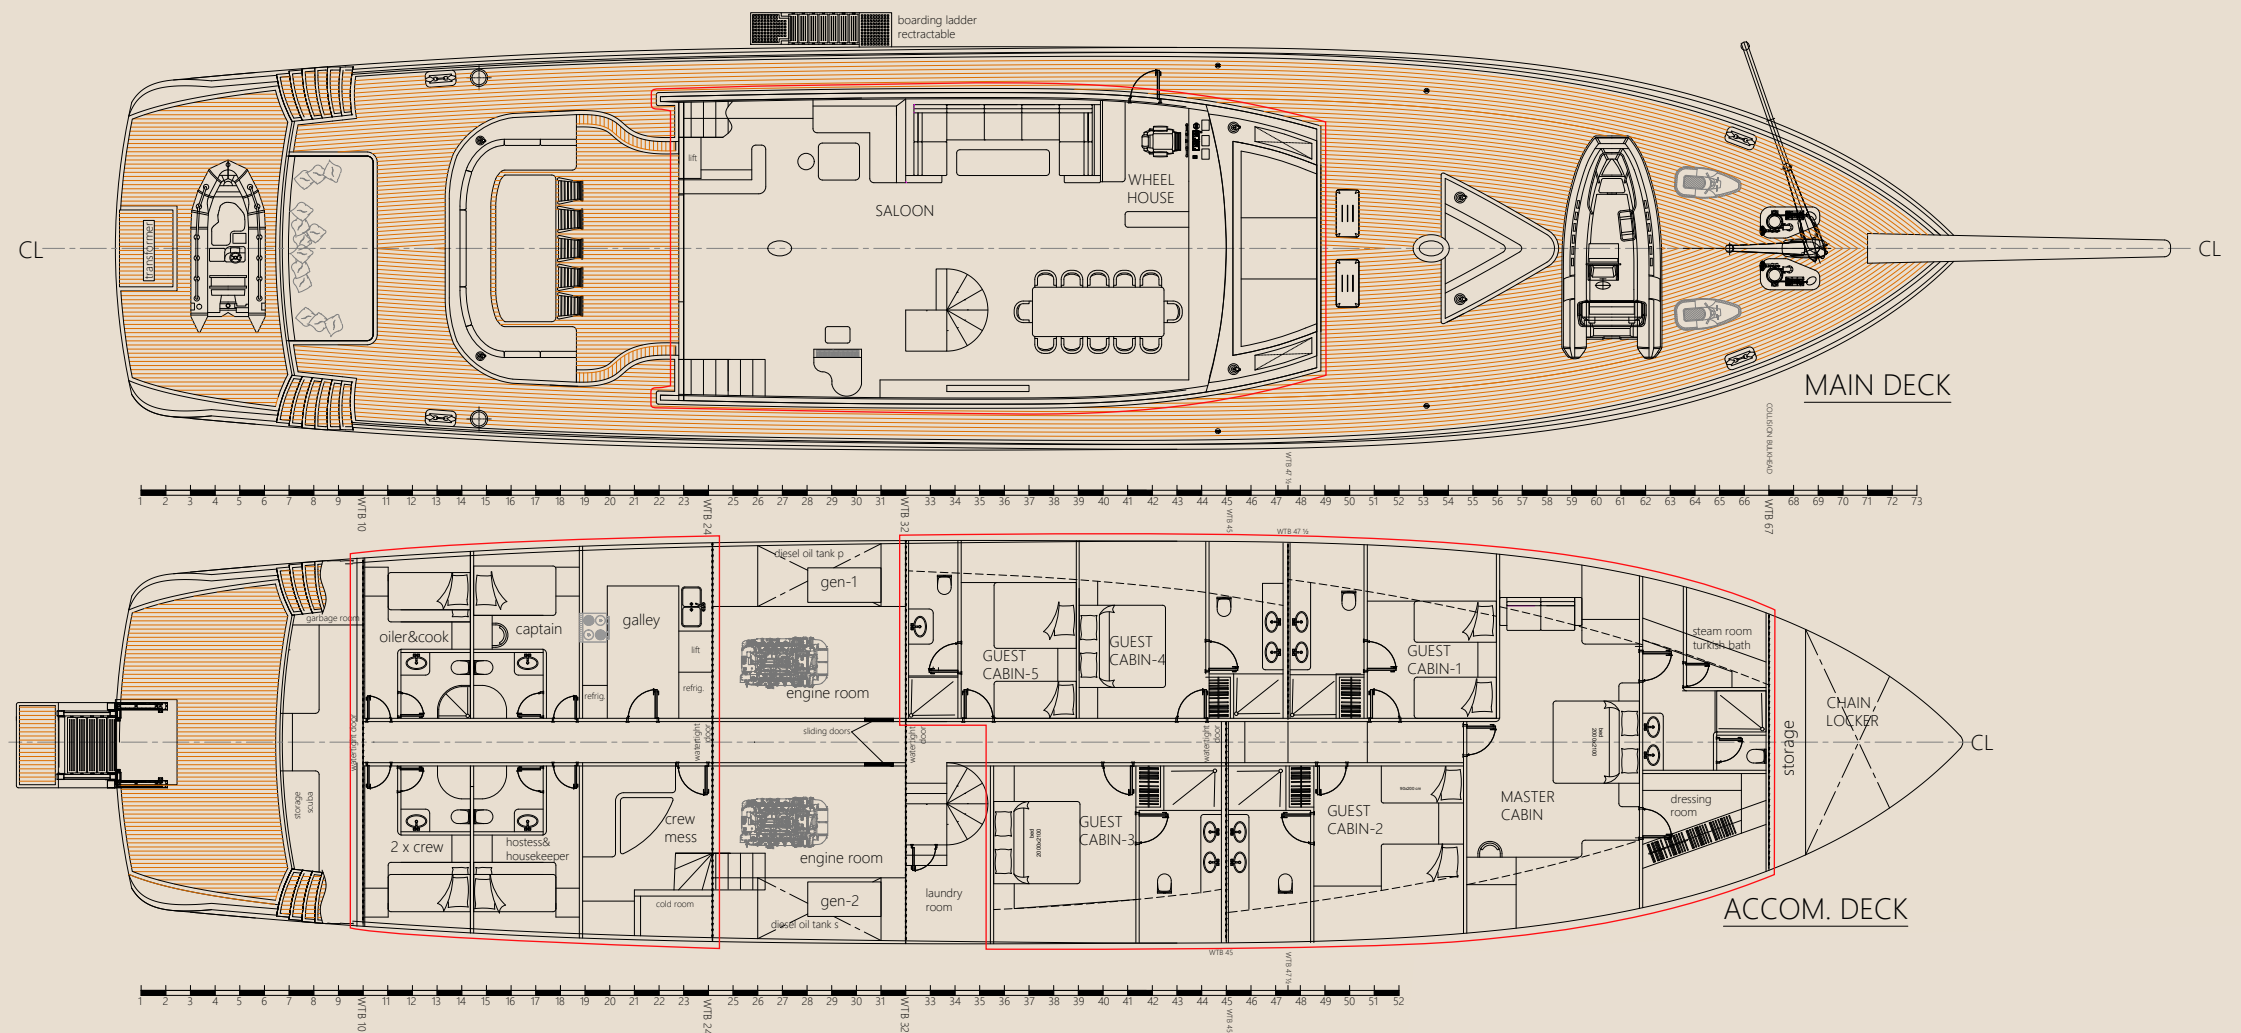

The living room makes 96m² and 13m long. The rear lounge was designed at the same level. From this place you have a clear view from inside on 17m.

The boat has six cabins. The Shipowner cabin is 50m². It houses a dressing room and a bathroom with steam bath. You there also find five double rooms as well as a laundry

In cabins, portholes have been positioned so that the outside is visible for a seated passenger. They measure 110cm by 50cm.

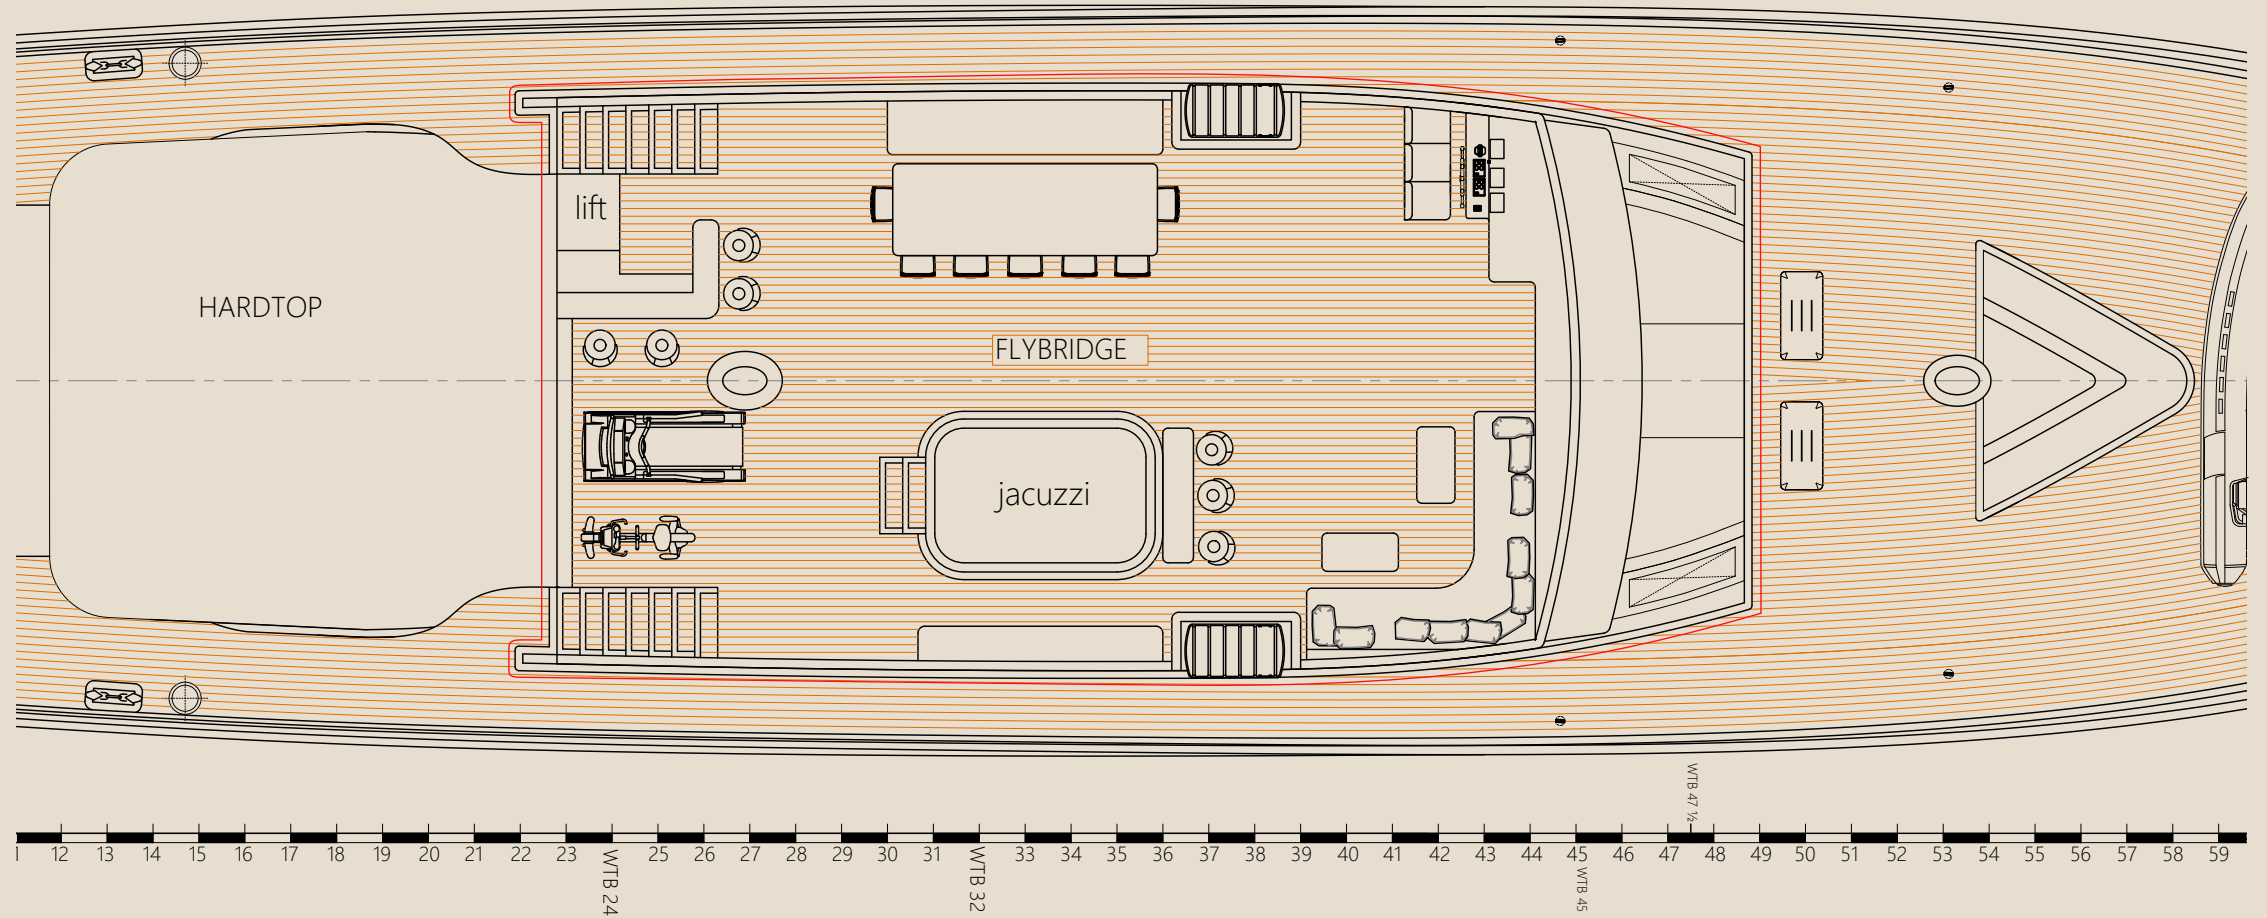

The rear of the boat has been reserved for the crew. We find their 4 cabins there which welcome up to 7 crew members, as well as a mess and a kitchen.

The Flying bridge above of the living room measures 94m². We relax in a Jacuzzi.

This fly includes a zone intended for sheltered fitness training and sports equipment.

You can also find a table for 12 people, one space comfortable and friendly near the pilot station, a 3rd bed where lie down, without forgetting a bar and, for one use ease, a freight elevator which serves the 3 levels of the boat.
